

MARIA ANTONIA FAJARDO

Davidson, NC | mafajardo@davidson.edu |

EDUCATION

DAVIDSON COLLEGE

Davidson, NC

B.S. in Computer Science, Minor in Digital Studies

Expected May 2027

Coursework: Web Design, Data Structures (OOP), Discrete Structures, Human-Computer Interaction, Analysis of Algorithms

WORK EXPERIENCE

SMURFIT WESTROCK - IT & Digital Solutions Intern

May 2026 - Present

- Collaborated with the Innovation and Automation team to build data analytics solutions, owning end-to-end experience from stakeholder research to implementation across manufacturing operations
- Investigated geocoding pipeline failures using Google Maps API data, tracing address matching errors across enterprise datasets to validate location resolution accuracy
- Redesigned a senior leadership dashboard applying information architecture and UX principles, restructuring KPI presentation for executive stakeholders
- Conducted stakeholder interviews to identify pain points and created an AI-powered chatbot for self-service analytics, applying GenAI tools to improve user experience
- Earned Palantir Foundry certifications across Pipeline Builder, Ontology, Contour, Quiver, Workshop, and Notepad

DAVIDSON RESEARCH ASSISTANT - DRIVE Lab Researcher

January 2025 - May 2026

- Conducting VR research using Unity and Xcode to evaluate impacts on confidence and engagement of underrepresented students in introductory computer science courses
- Designing and running a controlled experiment, analyzing quantitative and qualitative data from 47 participants
- Documenting findings and iterating on prototypes based on data-driven insights and user feedback

TRUIST + CISCO IMMERSIVE EXPERIENCE - Team Member

Oct 2025

- Selected to design human-centered experiences for the Truist Championship PGA Tour, applying design thinking and emerging technologies under Cisco design mentors
- Developed concept prototypes and UX strategies to strengthen client engagement and brand storytelling
- Collaborated with Truist executives to apply user-centered design methodologies in a fast-moving, ambiguous environment

SPORTSPARK - UX Evaluation and Redesign Lead

May 2025 – Nov 2025

- Led end-to-end UX redesign of SportSpark, a mental health app for college athletes, conducting heuristic evaluation using the NN/g framework to identify usability issues
- Redesigned the interface in Figma based on user-centered principles and accessibility guidelines, collaborating with developers on implementation
- Leading user testing to assess impact on usability and iterating on designs based on findings

INSPIRA RESEARCH - UX Research Intern

June 2024 – August 2024

- Learned the LEGO® SERIOUS PLAY® methodology and applied it to qualitative research on gender role evolution
- Assisted in conducting interviews with adults and older adults, analyzing data and extracting insights
- Presented findings at the IIEE Latin America conference

QUANTIL - Web Developer Intern

May 2024 – June 2024

- Supported development of internal web tools to filter and analyze large document sets related to Colombian territorial data
- Utilized React, TypeScript, and Apache ECharts to build data-driven visual interfaces

PROJECTS

ASSEMBLYVIZ - Web Based Code Visualization Tool

Jan 2025 - May 2026

- Designing interaction models and system flows for a web-based Assembly code visualizer, translating low-level program execution into intuitive visual representations.
- Developing user-centered features to improve debugging and conceptual understanding for students, iterating based on feedback from end users

ADDITIONAL

Technical Skills: Microsoft 365, GitHub, Adobe Suite. Quantitative and qualitative data analysis.

Certifications: Parsons UX Fundamentals, Palantir Foundry (4), IDEO Power of Purpose

Technologies: Figma, HTML, CSS, JavaScript, Python, Java, Palantir Foundry, Azure DevOps Google Maps API . **Bilingual** in Spanish and English.
